

Watlow's Series 988/989 is truly an innovation in the control field. The Series 988/989 is the first to combine so many key features into a single, $1 / 8$ DIN size package. No other control offers the flexibility, compact size and durability of the Series 988/989.

This control meets a wide variety of needs in the process industries. Its broad range of I/O options allows control of virtually any process variable.

From the long list of product features, the Series 988/989's ability to provide single unit cascade control of a process is perhaps the most unique. The Series 988/989 is the only $1 / 8$ DIN control with this feature. Other features include heater current monitoring, remote set point input, differential or ratio control. Valve control via slidewire feedback is another popular feature.

The Series 988/989 has all the standard characteristics you expect from a Watlow control and more. We expanded the auto-tuning capabilities and increased the alarm functionality. The Series 988/989 offers several unique control algorithms.

The Series 988/989 features a three-year warranty and four day shipment on all model numbers in limited quantities.

Your Authorized Watlow Distributor is:

Windows ${ }^{\circledR}$ is a registered trademark of Microsoft Corporation. Modbus™ is a trademark of AEG Schneider Automation.

## The Series 988/989 Offers More Features, Greater Versatility Than Any Other $1 / 8$ DIN Control

## Features and Benefits

Two universal analog inputs and one event input

- Provides greater application versatility

Compact size 103 mm (4.06 in.) behind panel depth

- Fits easily in confined areas

10 Hz sampling rate

- Improves control

## Windows ${ }^{\circledR}$ configuration software and Modbus ${ }^{\text {M }}$ serial

 communications- Offers remote operation

## Slidewire feedback input

- Monitors valve position and offers precision control

## Burst firing output

- Provides smooth process control

Signal conditioner power supply

- Eliminates the need for an external drive

NEMA 4X front panel

- Provides watertight and corrision resistance

## Product Highlights

## Easy to Operate

The Series 988/989's operator interface features the simplicity you expect from a Watlow control. The display key allows the operator to view information pertinent to the process, including deviation from set point, percent output and units of measurement.

The display key also returns the operator to the process and set point display from anywhere in the menu system. The setup menu is segmented into input, output, global and communication parameters, allowing movement forward or backward throughout the parameter sequence.

## Use Up To Four Outputs

The control can have up to four outputs total, including the standard Watlow output options, along with retransmit and communications. Up to three outputs can be defined as a power supply output to power external signal conditioners, eliminating the need for an external power supply. The output types are recognized by the control to simplify control setup and operation, with no need for DIP switches.

## Three Inputs Allow Greater Flexibility

To accommodate unique system configurations, the Series 988/989 offers two universal analog inputs and one event (digital) input. The analog input applications are explained in detail below. The event input allows the operator to select a function at the close of a switch. This can lock out the front panel, switch PID values, go to a remote or second set point, etc. The inputs are optically isolated from all outputs, eliminating the need for external isolation circuitry.

## Slidewire Feedback Valve Control

Valve positioning feedback (\% open, \% close) provides precise process control. The Series 988/989 is configurable for a wide variety of valves.

- Accepts virtually any valve input

- Front panel valve position display
- Increased valve life with anti-hunting parameter
- Greater process efficiency with precise control
- Easy set-up; increased operator productivity

## Cascade Control

Cascade control provides precise, two-variable process control. By measuring the secondary variable, the control can

"feed forward," and automatically determine the primary variable set point.

- Precise control via cascade configuration
- Display of both process variables
- Low cost; one unit does the work of two
- Increased operator productivity with fast set-up

## Ratio Control

Whether mixing materials or controlling temperature indirectly, ratio control with the Series 988/989 provides automatic set point adjustments in response to
 system changes.

- Simplified process control; one control does the work of two
- Low cost solution; one control, display access - both process variables
- One control for many applications
- Easy set-up; increased operator productivity

## Current Monitor

Current monitoring provides system performance and status information. The Series 988/989 accepts current transformer signal with no conditioning.

- Easily accessible heater status
- System performance data for troubleshooting or design enhancements
- System protection; fast shut down with overcurrent
- Easy setup; no external signal conditioner required

## Specifications

## Control Mode

- Dual input, quad output, optional retransmit of set point or process variable
- Programmable direct and reverse acting control outputs
- One step auto-tuning

Operator Interface

- Local/Remote set point capability
- Dual, four digit LED displays. Upper: 10 mm (0.4 in.), Lower: 8 mm (0.3 in.)
- MODE, AUTO/MAN, DISPLAY, UP and DOWN keys Input
- Contact input for software function select.
- Type J, K, T, N, C, D, E, R, S, B, Pt 2 thermocouple, $1^{\circ}$ or $0.1^{\circ}$ RTD, or $0-50 \mathrm{mV}, 0-100 \mathrm{mV}, 0-20 \mathrm{~mA}$, $4-20 \mathrm{~mA}, 0-5 \mathrm{~V}=(\mathrm{dc}), 1-5 \mathrm{~V}=(\mathrm{dc}), 0-10 \mathrm{~V}=(\mathrm{dc})$, slidewire, digital event input or heater current options
- Sensor break protection de-energizes control output to protect system or selectable bumpless transfer to manual operation. Latching or non-latching
- ${ }^{\circ} \mathrm{F}$ or ${ }^{\circ} \mathrm{C}$ display or process units, user selectable

## Output Options

- Solid state relay, 0.5A @ 24V~(ac) min., 253V~(ac) max., opto-isolated, zero cross switching. With or without contact suppression
- Switched dc signal provides a minimum turn on voltage of $3 V=$ (dc) into a minimum $500 \Omega$ load; maximum on voltage not greater than $32 \mathrm{~V}=$ (dc) into an infinite load
- Electromechanical relay, Form C, 5A @ 120/240V~(ac), $6 \mathrm{~A} @ 28 \mathrm{~V}=(\mathrm{dc}), 1 / 8 \mathrm{hp}$. @ 120V~(ac), 125VA @ 120V~(ac). With or without contact suppression
- Process, $0-20 \mathrm{~mA}, 4-20 \mathrm{~mA}, 0-5 \mathrm{~V}=(\mathrm{dc}), 1-5 \mathrm{~V}=(\mathrm{dc})$, or $0-10 \mathrm{~V}=(\mathrm{dc})$ reverse acting
- Electromechanical relay, Form A/B, 5A @ 120/240V~(ac), $6 \mathrm{~A} @ 28 \mathrm{~V}=(\mathrm{dc}), 1 / 8 \mathrm{hp}$. @ 120V~(ac), 125VA @ 120V~(ac). Without contact suppression
$U L^{\oplus}$ is a registered trademark of Underwriter's Laboratories, Inc.
- External transmitter power supply, 5V @ 30mA, 12 V @ 30 mA , or 20 V @ 30 mA
- EIA-232 communications or EIA-485/EIA-422 communications, opto-isolated

| Output Selection Table | 1 | 2 | 3 | 4 |

## Accuracy

- Calibration accuracy \& sensor conformity: $\pm 0.1$ percent of span, $\pm 1 \mathrm{LSD}, 77^{\circ} \mathrm{F} \pm 5^{\circ} \mathrm{F}\left(25^{\circ} \mathrm{C} \pm 3^{\circ} \mathrm{C}\right)$ ambient \& rated line voltage $\pm 10$ percent
- Accuracy span: $540^{\circ} \mathrm{C} / 1000^{\circ} \mathrm{F}$ minimum
- Temperature stability: $0.1^{\circ} \mathrm{C} /{ }^{\circ} \mathrm{C}\left( \pm 0.2^{\circ} \mathrm{F} /{ }^{\circ} \mathrm{F}\right)$ change in ambient
- Voltage stability: $\pm 0.01$ percent of span / percent of rated line voltage

## Agency Approvals

- UL ${ }^{\oplus}$, C-UL ${ }^{\oplus}$ File \#43684
- CE approved

89/336/EEC Electromagnetic Compatibility Directive
EN 50081-2: 1994 Emissions
EN 50082-2: 1995 Immunity
73/23/EEC Low-Voltage Directive
EN 61010-1: 1993 Safety

- NEMA 4X

Terminals

- \#6 compression universal head screws, accepts 20-14 gauge wire

## Power

- 100-240V $\sim(\mathrm{ac})+10$ percent/-15 percent, $50 / 60 \mathrm{~Hz}$, $\pm 5$ percent.
- 16VA maximum ac 10VA maximum, low power
- Data retention upon power failure via non-volatile memory

Operating Environment

- 0 to $65^{\circ} \mathrm{C}$ ( 32 to $149^{\circ} \mathrm{F}$ ), 0 to 90 percent RH, non-condensing

Mechanical

- $1 / 8$ DIN panel mount, NEMA 4X (IP65 equivalent) front panel
- Overall width $x$ height $x$ depth Horizontal; 4.03 in. x 2.18 in. x 4.74 in.
( $102 \mathrm{~mm} \times 55 \mathrm{~mm} \times 120 \mathrm{~mm}$ )
Vertical; $55 \mathrm{~mm} \times 102 \mathrm{~mm} \times 120 \mathrm{~mm}$
(2.18 in. x $4.03 \mathrm{in} . x 4.74 \mathrm{in}$.)
- Depth behind panel; 103 mm (4.06 in.)
- Weight less than or equal to 0.40 kg (14.0 oz)

## Ordering Information

To order, complete the model number to the right with the information below:

Series 988/989 = Single channel, temperature/process controller, 2 inputs, 4 outputs, 2 digital inputs.
Power Supply \& Mounting
$=24$ to $28 \mathrm{~V} \approx(\mathrm{ac} / \mathrm{dc})$ nominal, vertical mounting
$=24$ to $28 \mathrm{~V} \approx(\mathrm{ac} / \mathrm{dc})$ nominal, horizontal mounting
$=100$ to $240 \mathrm{~V} \approx(\mathrm{ac} / \mathrm{dc})$ nominal vertical mounting
$=100$ to $240 \mathrm{~V} \approx(\mathrm{ac} / \mathrm{dc})$ nominal horizontal mounting

## Software
